主題敘述：Arcsoft 拼接軟體使用操作

步驟 1：點程式集或所有程式，將 Arcsoft Scan -n-Stitch Deluxe 開啟。

*如果想要拼接的尺寸不是 A3，請選擇 Legal 尺寸頁面。

The screenshot shows the ArcSoft Scan-n-Stitch Deluxe software interface. At the top, there is a blue header with the text "ArcSoft Scan-n-Stitch Deluxe™". Below the header, there is a light blue area with the text: "Scan-n-Stitch讓您可以將Legal、A3文檔和其他大型文檔，如剪貼簿、藝術作品和海報使用A4掃描器進行數位化處理。開始掃描一個新頁面或載入已掃描頁面的所有檔案。". Below this text are two buttons: "掃描頁面" (Scan Page) and "載入檔案" (Load Files). Below the buttons is a sidebar with the text "怎樣掃描：" (How to Scan:). The sidebar contains several options: "Legal尺寸頁面" (Legal Size Page), "A3尺寸頁面" (A3 Size Page), "剪貼簿頁面" (Clipboard Page), "長卷手冊" (Long Roll Book), and "海報頁面" (Poster Page). The "Legal尺寸頁面" option is highlighted with a red box. A red arrow points from this box to a text box that says "非A3規格請選擇Legal尺寸項目." (For non-A3 specifications, please select the Legal size item.). To the right of the sidebar, there is a section titled "Legal尺寸頁面" (Legal Size Page) with the text "需要重疊掃描2次" (Need to scan 2 times with overlap). Below this text are two numbered steps: "1. 頁面頂端與掃描器平板對齊，點選掃描。" (1. Align the top edge of the page with the scanner bed, click Scan.) and "2. 文檔旋轉180度，頁面底邊與掃描器平板對齊，點選掃描。" (2. Rotate the document 180 degrees, align the bottom edge of the page with the scanner bed, click Scan.). Below the steps are two diagrams showing a document being scanned. The first diagram, labeled "1", shows the document with the top edge aligned with the scanner bed. The second diagram, labeled "2", shows the document rotated 180 degrees with the bottom edge aligned with the scanner bed. A circular arrow between the two diagrams indicates the rotation. At the bottom of the interface, there is a printer icon and the text "可列印掃描操作說明書" (Can print the scanning operation manual).

步驟 2：將文件正面放在掃描平台（內容頁朝下）。

步驟 3：原稿放正後再放上白板降低其他黑色區域產生。

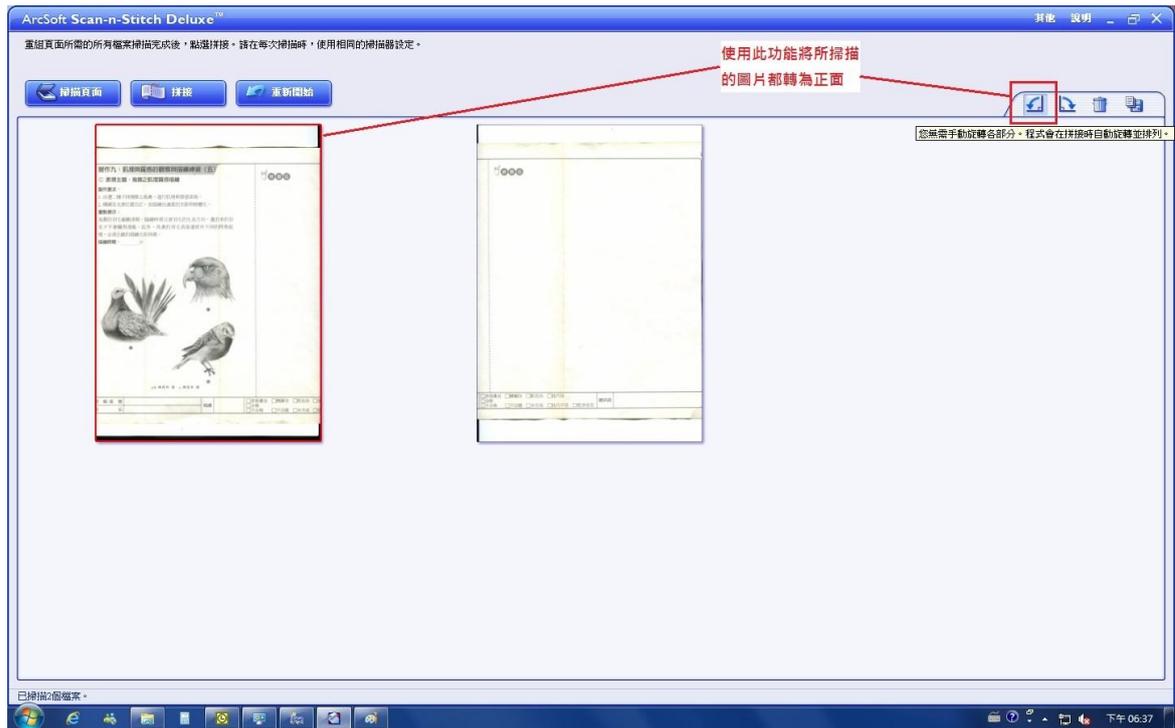

步驟 4：開啟 EPSON SCAN 掃描左邊區塊

步驟 5：掃描右邊區塊

步驟 6：

步驟 7：
